

# **ATTENTION!**

## **For American customers only**

The European range of octane is different from the American one:

e.g. EU (E5) 95 OCTANE = US 91 OCTANE / EU 98 OCTANE = US 93 OCTANE

For Thor engines you have to use a high-octane gasoline (not less than US 91) maximum 5% of Ethanol.

**ATTENTION!** It is important to use 100 LL AVGAS in case the fuel above mentioned is not available.
